Why Savage Bobber ?

In our continued commitment to the research of new formulas and innovations, Zlin Aviation s.r.o. has decided to enter into a decidedly original dimension, an area up to now unexplored: the customization of the aircraft through the client's expression of his own personality and originality, as applied to flight. The open cockpit gives to the pilot a true sensation of freedom and the contact with the wind, becomes an unforgettable experience (for cold weather, cabin heating and a kit for enclosing the entire cabin section are also available).

Choose between:

15 different colors for the engine, 20 colors for the fuselage, 2 types of chrome finishing, 8 types of high quality leather, 10 types of leather bags, 3 colors of seat belts, 2 types of seats (including the option of high quality saddles from the motorcycle industry), 10 different paint schemes, 4 colors for the propellers, 2 types of original instrument panels and much more (textured colors for the fuselage tubes, specific supports for optionals like fuel tanks, surfboards, fishing poles, hunting rifles, etc.), are all evidence of our continued efforts to meet every need of our customers. And if that isn't enough, our "Exclusive" program offers you the opportunity to create original pieces and accessories, produced and tested just for you.

Savage Bobber . . . the answer to your every desire.
